Premium as a Percent of income for the 2nd lowest cost Silver plan		< 133% 2% or Medicaid	133-150% 3 - 4%	150-200% 4 - 6.3%	250-300% 8.05-9.5%	300-400% 9.5%					
<p>The subsidy process works by limiting your premium to a percent of your Modified Adjusted Gross Income (MAGI). The row highlighted in yellow shows the "cap" on your premium as a percent of your MAGI. The actual subsidy is determined by comparing the appropriate percent of your income to the 2nd lowest cost Silver plan. If the 2nd lowest cost Silver plan is above your "percent of income" you will receive a subsidy. If the 2nd lowest cost Silver plan is below your "percent of income" you are not eligible for a subsidy.</p>
